

## **Sport a Cut, Barbershop**

*Look good, feel great!*

We take pride in our shops appearance! The shop is thoroughly cleaned and disinfected twice a week. Our primarily goal is to maintain a germ free shop. We begin by sterilizing the doorknobs right down to the garbage cans. This prevents our staff and clients from catching germs that may be present.

### ***Toddler's Kiddy Chair Racecar Station***

Our Toddler's Kiddy Chair is sterilized with a mild disinfectant before and after each haircut.

### ***Children's Racecar Station***

Our young children's racecar station is designed for your child to enjoy his or her haircut while watching either a movie or play the Wii for their entertainment. Each child gets their hands disinfected prior to touching the Wii's remote control. We take extra precaution to be sure no child catches germs during their haircut.

### ***Children's Play Area***

We currently have a kitchen, table set for two and a large assortment of learning books for your children to enjoy while waiting for their turn. We thoroughly spray the children's play area with a mild disinfectant several times a day.

### ***Adult's Stations***

Adult stations are also disinfected and hair free throughout the course of the day.

### ***Restrooms***

Our restroom is spotless and clean always. Periodically throughout the day it is disinfected, wiped dry and the garbage can is continuously being discharged.

### ***Toddler's Changing Table***

Our toddler's changing table located in the restroom is constantly being changed and disinfected. You have our one percent (100%) guarantee your baby is not going to be in contact with germs in our shop.
